

## Our Products

### 01 Activated Carbon

Welcome to Yuanli Powdered Activated Carbons, a leading manufacturer and supplier of high-quality powdered activated carbon products from China. With decades of expertise in the carbon industry, we specialize in providing advanced solutions for air, water, and industrial process purification. Our products are designed to deliver exceptional performance in the most demanding filtration applications.

### 02 Radiolite

Radiolite Filter Aid Powder is a specialized filtration material used to enhance the performance of liquid filtration systems. Made from high-purity diatomaceous earth or perlite, Radiolite is ideal for applications where fine particles need to be removed from liquids. The powder's unique structure creates a porous matrix that provides excellent filtration capacity, allowing for faster filtration rates and cleaner filtrates.

*We are the authorised agents for these products in India.*

## Why Choose Yuanli 元力

Quality Assurance

Global Reach, Local Expertise

Sustainability Commitment

*Cynergy Enterprises (exclusive agent for Yuanli Powdered Activated Carbons – Purity. Performance. Sustainability.)*

## Why Choose

Trusted Quality

Customization

Proven Track Record

Sustainable Practices

**cynergy**  
enterprise

We are supplier for Indian Activated Carbon & Imported Activated Bleaching Earth

## Why Choose Us

Quality Assurance

Expert Support

Sustainability Commitment

## Why Choose Yuanli Activated Carbons?

PAC, GAC and pellets

### Superior Adsorption

Our powdered activated carbons are specially engineered for maximum adsorption efficiency. The high surface area and porous structure of our products enable them to capture and retain a wide range of contaminants, ensuring optimal purification results.

### Tailored Solutions

We understand that each application is unique. Yuanli offers customized powdered activated carbon solutions designed to meet your specific needs, from water treatment to air purification and beyond.

### High Purity Standards

We maintain rigorous quality control processes to ensure that our products meet the highest purity standards. Whether you need activated carbon for food-grade applications or industrial use, Yuanli guarantees consistency and reliability in every batch.

### Eco-Friendly

Sustainability is at the core of our operations. Yuanli is committed to reducing our environmental footprint by using sustainable production practices, recycling materials, and promoting the use of eco-friendly activated carbon solutions.

### Environmental Protection

We provide solutions for air and gas purification, helping industries reduce harmful emissions and comply with environmental regulations.

## About the company

### Get to know us.

At Cynergy enterprises, we specialize in providing high-quality filtration products designed to meet the diverse needs of industries and consumers alike. Our flagship products, Radiolite Filter aid Powder and Activated Carbon, are engineered for efficiency, safety, and environmental sustainability. Whether you are in the food and beverage, water treatment, or industrial sectors, Pharmaceuticals, Breweries, Textile, Cosmetics, Rubber, Surfactants, Adhesive, Oil, Paints etc. Cynergy Enterprises has the right solution for you.

## Applications

### Activated Carbon & Radiolite

Water  
Treatment

Food  
& Beverage

Applications

## Key Benefits

### Radiolite Filter Aid Powder

### Superior Filtration Efficiency

Radiolite's finely engineered particles provide exceptional filtration capacity, efficiently removing suspended solids and contaminants from liquids.

### Faster Filtration Rates

The high porosity of Radiolite's filter aid powder reduces clogging and increases flow rates, allowing your filtration process to be faster and more efficient.

### Improved Product Quality

Whether in food & beverage production, pharmaceuticals, or chemical processing, Radiolite ensures a cleaner, more refined product by removing impurities and improving the clarity of liquids.

### Cost-Effective Solution

By reducing filtration time and improving the quality of your final product, Radiolite provides an economical solution for your filtration needs. Less downtime and reduced material costs make Radiolite an excellent investment for your filtration systems.

### Environmentally Friendly

As a naturally occurring, non-toxic material, Radiolite is safe for both your workers and the environment, making it a sustainable option for your filtration processes.
