

Letter Pookolam

CHILD-LED
ACTIVITY

Objectives

- To enhance fine motor skills
- To associate letter with sound

Materials Needed

- Chalk, petals of flowers of two colours

Instructions

- Parent to draw any two letters on the floor using chalk . One for him and one for the child.
- Choose those letters in which your child needs more practice in or those he is familiar with
- Parent can start the activity by picking up petals and placing on the letter on the floor
- Taking the cue, the child will also start the activity.
- Please note that the parent is not to give any instruction but only be a silent observer
- When the child sees two colours, he will automatically make patterns with them. But if he does not, then the parent can start making patterns (on his letter) using the two colours without saying a word.
- Once the child is done, the parent can ask the child which sound it is and to give one or two more words starting with that sound.
