

CHILD-LED ACTIVITY

Objectives

- To associate symbol with quantity from 0 to 9
- To enhance fine motor skills

Materials Needed

- Play dough/ homemade dough

Instructions

- Parent to roll the dough to make the number one and place it on the sheet
- Pointing to the number dough ask "What number is this?"
- Child will reply 'one'
- Now ask the child 'How many?'" pointing to the squares
- Wait for the response and hand over a small ball to place in the square
- Allow him to take over
- Observe him from a distance when he begins with the number 2
- Finally, when he reaches zero, he will realize that there is nothing to quantify.
