# BRINGING THE CLASSROOM EXPERIENCE HOME

## VIRTUAL LEARNING GUIDELINES FOR PARENTS

Dear Parents,

At KLAY, our child is our focus and will always remain so. As we get ready for our new and exciting learning platform that has been designed to bring out the very best in our child, we need you to partner with us so that together, we can make the virtual world of learning as wonderful as possible for our child.

As a learning community, our aim is to always ensure that our online learning practices are in sync with globally accepted norms. Please find below some guidelines that we request you to keep in mind so that we provide our child with the best learning environment.

## HELP YOUR CHILD GET INTO A ROUTINE

- Children thrive on a routine and hence we need to establish a daily routine to support our child's learning and make them look forward to their virtual classes.
- Create a quiet, comfortable and well lit KLAY Korner for your child where he/she can attend the session, without any disturbance.

- For the session, your child will need a fully charged camera enabled laptop/smart TV screen placed at eye level as well as a strong internet connection.
- Children are most comfortable working on the floor. Please place a rug or a low lying desk/chowki for them to use during the sessions. However, do ensure that your child maintains the right posture while sitting.
- We request you to place all the required items that the child uses within easy access.
- Our sessions include lots of activities that involve movement ensuring that the child is not seated for too long. We request you to ensure that there is ample space for your little one to move around.
- Please ensure that your child is appropriately dressed for the learning environment.

## MAKE LEARNING A WONDERFUL EXPERIENCE

- 1 Encourage your child to interact and respond to the facilitator, during the live session. This will make it even more fun for him/her. However, please do not force them to face the camera or sit in one place.
- 2 We request you to put all your devices on mute and unmute only when your child is interacting.
- 3 While we would like the children to do all the activities by themselves, we would also request you to be available so that you can support or guide your child wherever required.
- 4 A lot of effort has gone into making these exciting session for our children. To ensure that we all start these sessions on time and with no distractions, we request you to kindly login at least 5 minutes ahead of time.
- 5 Please ensure that your child is well-rested & well fed so that they can thoroughly enjoy the session.
- 6 The session activities are interspersed with frequent breaks. Kindly instruct your child to get up and walk around and/or stretch for a few minutes during these breaks.
- 7 There will be a short snack break during the session for your child to develop social skills and help them become independent eaters. Please organize appropriate fruits like cut apples, papaya, banana as per your child's preference.
- 8 To ensure that your child benefits the most out of these sessions and to track their development, we request you to ensure that the offline assignments given to your child are submitted on time.
- 9 We will be sharing with you the pre-session online resources and required stationery etc. These are basic items that are easily available at home. In order to ensure that your child does not feel left out, we request you to keep them ready well in advance for the session every day.
- 10 We will be sharing a daily developmental learning tracker with you. We request you to maintain it on a daily basis so that we can together track our child's development.
- 11 We have planned the sessions in such a way so as to maintain the right balance between online and offline learning experiences. A detailed Parent Handbook will be shared with you shortly.
- 12 We are in the process of forming a virtual classroom support team, the details of which will be communicated with you shortly.
- 13 Write to us at [learnathome@klayschools.com](mailto:learnathome@klayschools.com) for admission queries, technical support and any other information.

This is a new learning experience for the child as well as for us and there are sure to be teething problems and initial technical glitches. Please be patient with us as we overcome these. Let us partner and work with each other with the sole goal to keep our children busy and happy in a constructive manner while they are at home.

Let the joy of learning always continue with KLAY!

Thank you  
and Regards  
Team KLAY
