Ways To Develop Language Skills In Toddlers

The moment your baby says his/her first word is a precious one and what's more priceless is when your child calls out Mamma or Dadda (Mom or Dad). It's a moment all parents wait for eagerly: their child's first word.

This is just the beginning and there is so much more to come. language development is a critical part of your child's holistic development. It supports your child's ability to communicate, express, and understand feelings. Additionally, a well-built vocabulary also boosts confidence.

Recent research by MIT has shown that not just language but an intentional conversation between an adult and a child is what can actually develop the child's brain. The more interactive conversation and play kids are involved in, the more they learn.

Try these strategies to facilitate language development in your child-

1. Song and dance
2. Make-believe conversations
3. 'I spy'
4. Read, Read and Read
