## DENTAL CARE FOR CHILDREN IN THE COVID TIMES

The year 2020 has been challenging in a number of ways. Adjusting, adapting and modifying ones ways of life in the most optimal and safest possible way seems the best way forward.

However, expecting young kids to understand the intensity of the situation is very hard. Most parents have loosened up with respect to their [screen time](#) allowance and most importantly food habits. Many parents complain of increased consumption of junk and sweet food items. In this context, the most common challenge faced by the parents has always been that it is very difficult to get their child to brush their teeth

### WAYS TO INSTILL A POSITIVE ORAL HYGIENE PRACTISE

- Make brushing a fun family activity
- From a very young age, instil a positive attitude towards brushing. It should never seem like a punishment
- Use musical brushing videos to make them interested and learn the right techniques of brushing and tongue cleaning from a very young age
  - Kids learn best by observing- TELL-SHOW-DO. So it is always suggested that they watch a parent/older sibling while brushing their teeth. The important points to be kept in mind are the technique of brushing and the time duration of 2 minutes
