

SankalpTaru training session at their Research Center

SankalpTaru team believes in refining its skills by learning new innovative plantation methods to greenify environment more efficiently. With the same vision, our operations coordinators from all over India attended a three-days long training session at SankalpTaru R&D Center near Dehradun, UK, where they were upskilled on how to prepare cow dung cocoons and innovative farming techniques. As the attendees were excited to have many more of such sessions in future, they were honored with certificates as a token of appreciation for their dedication.

Practice could make us perfect,
but training helps in refining our perfection!

Training sessions at SankalpTaru R&D Center

Our sincere homage to the immortal Pulwama martyrs

The recent Pulwama terrorist attack had left the entire nation into utter grief. This pain of losing our bravehearts isn't easy to deal with. Thus, SankalpTaru simply did its bit to pay sincere homage to the immortal Pulwama martyrs by planting flowering saplings on the name of our each brave warrior. The plants have been rooted on the rocky land of Aravallis mountains and in New Delhi to commemorate the sacrifice of India's real heroes. Therefore, as the saplings grow healthily with affectionate nurturing, they will forever flourish in the name of our courageous soldiers.

Rejuvenating Delhi parks with lush greenery

SankalpTaru has set on a vigorous mission to mitigate Delhi's striking pollution levels by rejuvenating its public parks with healthy trees. Under the initiative, we are urging Delhi residents to help us in identifying the public parks around them which have a scope of further betterment by making them greener. Individuals can share with us the photographs of respective parks and SankalpTaru team would accordingly carry out a survey and have discussion with concerned RWA to get their consent. This will not only help us in transforming Delhi's barren parks into lush green patches, but the action plan will also freshen the environment by creating a healthy ecosystem in the capital city.

Opportunity to fight Delhi air pollution with SankalpTaru!

- 1 Let us know any government parks around you which lack greenery
- 2 Whatsapp park photos or call on our Tree helpline 740 9999 111
- 3 Our team will survey the park for plantation consent
- 4 The green mission begins with you and us together planting trees in the parks to beautify Delhi

Any prizes? Yes of course!

Fresh oxygen and healthy aroma to be produced for your beloveds.

SankalpTaru treasured green memories at Accenture, Bangalore

We had a great time interacting with Accenture, Bangalore employees through our kiosk set up at their office. The enthusiastic team came forward and pledged to plant trees online with us to reduce their carbon footprints and serve the environment with their part of share. Also, the enthusiasm each one of them carried towards greenifying Mother Nature was super amazing.

Planting trees amid Delhi hailstorms – Mercer Cares

Despite hailstorms and the weather not at all being harmonious to us, nothing could stop SankalpTaru and Mercer Cares teams from planting trees at UP Police Lines in Greater Noida. The campaign became more energetic as the police officials too joined us in contributing towards Mother Nature and enjoyed playing with the mud. Our trees will further sequester carbon dioxide from Delhi NCR's polluted atmosphere and will freshen it with purity and greenery.

Happy trees, healthy Maharashtra – Syngenta

Last year during the month of August, SankalpTaru and Syngenta had together planted several trees at Tejdhyan Foundation Manan Ashram in Pune city of Maharashtra to rejoice the vicinity with greenery. Since then our plants are being affectionately nurtured with a healthy survival rate and are definitely giving a tough time to Pune pollution with their lush foliage. We are maintaining round-the clock ward and watch of the plantation blocks and diligently preserving our green livings from mortality.

Beneficiary of the month

Don't go by her wrinkles, but the passion she carries to cultivate her land is enough to amaze anyone. Laxmi Bhikam Khatate is our marginal farmer beneficiary from Zendewadi village of Pune district in Maharashtra who is supported with Mango saplings. Despite of the severe water shortage in her region, Laxmi struggles hard to foster her orchard and endeavors to watch them flourish with luscious fruits.
